Business Partnership and Collaboration

- Collaborate with business stakeholders to understand their data needs and develop solutions to meet those needs
- Provide data-driven insights to inform business decisions, such as market trends, customer behavior, and operational efficiency
- Work with cross-functional teams to develop and implement data-driven solutions to drive business growth and improvement

Data Quality and Governance

- Ensure data quality and integrity by developing and implementing data validation rules, data cleansing processes, and data quality metrics
- Develop and maintain data governance policies, procedures, and standards to ensure compliance with regulatory requirements and industry best practices

Technical Skills and Tools

- Proficient in data analysis and visualization tools, such as Tableau, Power BI, or D3.js
- Experience with programming languages, such as Python, R, or SQL
- Familiarity with data management tools, such as Excel, Access, or SQL Server
- Knowledge of machine learning and statistical modeling techniques, such as regression, clustering, or decision trees

Education and Experience:

- Bachelor's degree in Computer Science, Statistics, Mathematics, or a related field
- At least 2 years of experience in data analysis, business intelligence, or a related field
- Strong analytical and problem-solving skills, with the ability to work independently and as part of a team
