Responsibilities:

1. **Security Monitoring:** Monitor and analyze security events and alerts to detect potential security breaches or unauthorized access. Investigate and respond to security incidents, conducting forensic analysis when required. Collaborate with cross-functional teams to implement proactive measures to mitigate risks and enhance security posture.
2. **Vulnerability Management:** Conduct regular vulnerability assessments and penetration tests to identify vulnerabilities in systems, networks, and applications. Analyze assessment results, prioritize vulnerabilities based on risk, and collaborate with relevant teams to remediate or mitigate identified vulnerabilities. Stay updated with emerging threats and security technologies to continuously improve vulnerability management practices.
3. **Security Compliance:** Ensure compliance with internal policies, industry standards, and regulatory requirements related to information security. Conduct periodic security audits and risk assessments to identify gaps and recommend appropriate controls and countermeasures. Collaborate with internal stakeholders to implement security best practices and provide guidance on security-related matters.
