Description

TCS Careers For Freshers Candidates

As a QA Engineer at TCS, you'll be the guardian of quality, championing exceptional user experiences across diverse software projects. You'll collaborate with developers, designers, and stakeholders to design, implement, and execute comprehensive testing strategies. Your keen eye for detail and analytical skills will be instrumental in identifying and resolving software defects, ensuring our products meet the highest quality standards.

TCS Job Search

Responsibilities:

- Design and execute test cases across all software development phases (unit testing, integration testing, system testing, and user acceptance testing).
- Develop and maintain automated testing scripts using industry-standard tools like Selenium, Appium, and JMeter.
- Analyze test results, identify defects, and report them effectively to developers using bug tracking systems.
- Collaborate with developers and stakeholders to resolve bugs and ensure timely delivery of high-quality software.
- Stay updated with the latest testing methodologies and technologies to

continuously improve testing practices.

TCS Job Vacancy Near Me

Skills:

- Strong understanding of software development methodologies (Agile, Waterfall) and testing principles (STLC, Test Automation).
- Proficiency in manual and automated testing techniques (API testing, UI/UX testing, performance testing).
- Experience with popular testing frameworks and tools (Selenium, Appium, JMeter).
- Excellent analytical and problem-solving skills with a keen eye for detail.
- Strong communication and collaboration skills to effectively interact with developers, designers, and stakeholders.
