Description

TCS Recruitment 2023

As a Software Engineer at TCS, you will be part of a dynamic team that develops and maintains software solutions to meet client requirements. Your primary responsibility will be to design, develop, test, and deploy software applications using various programming languages and technologies. This position offers an exciting opportunity to work on diverse projects, collaborate with cross-functional teams, and contribute to the success of leading technology solutions.

TCS Careers

Responsibilities:

1. Software Development: Design, code, test, and debug software applications according to project requirements. Collaborate with team members to understand client needs and translate them into functional specifications. Develop clean, efficient, and reusable code that adheres to coding standards and best practices.
2. Problem Solving and Troubleshooting: Analyze technical issues, identify root causes, and propose effective solutions. Debug and resolve software defects and performance issues. Continuously monitor and optimize application performance, security, and scalability.
3. Collaboration and Documentation: Collaborate with cross-functional teams, including project managers, designers, and quality assurance engineers, to

ensure successful project delivery. Participate in code reviews to ensure code quality and adherence to established guidelines. Document technical specifications, system designs, and project-related information as required.
