TCS Careers

Responsibilities:

1. Security Operations: Monitor and manage the security operations of TCS's IT infrastructure. Implement security measures to protect against unauthorized access, threats, and vulnerabilities.
2. Incident Response: Investigate and respond to security incidents, including identifying the root cause, containing the incident, and implementing measures to prevent recurrence.
3. Security Audits: Conduct periodic security audits and assessments to identify weaknesses and gaps in security controls. Develop and implement remediation plans to address identified issues.
4. Risk Management: Assess and manage information security risks by identifying potential threats, evaluating vulnerabilities, and implementing appropriate risk mitigation strategies.
5. Security Policies and Procedures: Develop, review, and enforce information

security policies and procedures in line with industry standards and regulatory requirements.

6. Security Awareness and Training: Conduct security awareness programs and training sessions to educate employees on best practices for information security and data protection.

7. Security Architecture: Collaborate with the IT team to design and implement secure IT infrastructure, networks, and systems. Ensure compliance with security standards and frameworks.

8. Security Incident Reporting: Prepare and submit timely reports on security incidents, trends, and metrics to management. Provide recommendations for improving the overall security posture.

9. Security Compliance: Ensure compliance with applicable security regulations, laws, and industry standards. Stay updated on the latest security threats and trends.

10. Security Governance: Contribute to the development and implementation of the overall information security strategy and governance framework.
