Description

TCS Recruitment 2023

As an Application Developer, you will be responsible for designing, developing, and maintaining software applications that meet the needs of our organization. You will work closely with cross-functional teams to understand requirements, develop efficient code, and ensure the successful implementation of software solutions. Your strong programming skills, problem-solving abilities, and attention to detail will contribute to the development of high-quality applications that enhance our business processes and deliver value to our users.

TCS Careers

Responsibilities:

1. Collaborate with stakeholders, including business analysts and users, to gather and understand application requirements, objectives, and user needs.
2. Design, develop, and test software applications, ensuring adherence to coding standards, best practices, and software development methodologies.
3. Write clean, efficient, and maintainable code, leveraging appropriate programming languages, frameworks, and libraries.
4. Participate in the entire software development lifecycle, including requirements analysis, design, implementation, testing, deployment, and

maintenance.

5. Conduct thorough testing and debugging of applications to identify and resolve any defects or issues.
6. Collaborate with cross-functional teams, such as UI/UX designers, product managers, and quality assurance, to ensure the seamless integration and functionality of the application.

TCS Jobs Near Me

Qualifications:

1. Bachelor's degree in computer science, software engineering, or a related field (relevant certifications and experience are a plus).
2. Proven experience in application development, preferably in developing web or mobile applications.
3. Strong programming skills in languages such as Java, C#, Python, or JavaScript, with experience in frameworks and libraries relevant to application development.
4. Familiarity with software development methodologies, such as Agile or Scrum, and experience with version control systems (e.g., Git).
5. Solid understanding of database concepts and experience working with relational databases (e.g., MySQL, PostgreSQL, Oracle).
6. Proficiency in front-end technologies, including HTML, CSS, and JavaScript frameworks (e.g., React, Angular, Vue.js).
