TCS Careers

Responsibilities:

- **Gather and analyze operational data:** Utilize various data analysis tools and techniques to collect, clean, and analyze operational data from different sources.
- **Identify and assess operational issues:** Pinpoint bottlenecks, inefficiencies, and potential risks within processes and systems.
- **Develop and propose solutions:** Based on your analysis, recommend data-driven solutions to optimize processes, reduce costs, and improve performance.
- **Prepare reports and presentations:** Communicate insights and recommendations effectively through clear and concise reports and presentations to various stakeholders.

- **Support implementation of solutions:** Work collaboratively with teams to implement approved solutions and track their impact.
- **Stay updated on industry trends:** Continuously learn and stay abreast of best practices and emerging technologies in operations management.
