Job Location

India
Remote work from: IND

Base Salary

Rs. 25,000 - Rs. 40,000

Qualifications

12th, Graduate

Employment Type

Full-time

Description

Web Developer in Adobe

A web developer is a professional responsible for building and maintaining websites, applications, and other digital platforms. They use programming languages, frameworks, and tools to create interactive and user-friendly interfaces. Web developers work on the client-side (front-end), server-side (back-end), or full-stack (both front-end and back-end).

Job Description

As a web developer in Adobe, your primary responsibility will be to design, develop, and maintain Adobe's web applications and services. You will work closely with cross-functional teams to identify and prioritize project requirements, develop and test new features, and ensure timely delivery of high-quality products.

Key Responsibilities:

- Design, develop, test, and deploy web applications using Adobe's technology stack
- Collaborate with product managers, designers, and other stakeholders to understand project requirements
- Write clean, efficient, and well-documented code
- Participate in code reviews and ensure adherence to coding standards
- Troubleshoot and debug issues in a timely and efficient manner
- Stay up-to-date with industry trends and emerging technologies

Skills and Qualifications

To be a successful web developer in Adobe, you should possess the following skills and qualifications:
