**Description** 

# **Accenture Careers**

# **About Accenture**

At Accenture, we transform businesses and people with the power of new technologies. We are a global professional services company with leading capabilities in digital, cloud, and security. We work at the intersection of business and technology to help clients become intelligent enterprises.

# Why Join Us as a DevOps Engineer?

In this exciting role, you'll play a pivotal role in driving innovation and agility at Accenture. You'll leverage your expertise in DevOps principles and tools to build, automate, and optimize our software development lifecycles. This is your chance to collaborate with top talent across the globe, tackle complex challenges, and make a real impact on some of the world's most recognizable brands.

### The Position

Accenture is seeking a passionate DevOps Engineer to join our growing team. As a remote employee, you'll have the flexibility to work from anywhere while contributing to cutting-edge projects.

# Hiring organization

Accenture

# Date posted

April 15, 2024

# Valid through

31.12.2024

**APPLY NOW** 

# **Job Summary**

As a DevOps Engineer, you'll be responsible for the entire software delivery pipeline, from continuous integration (CI) to continuous delivery (CD). You'll design, develop, and implement automated solutions to streamline development processes, improve software quality, and accelerate deployments. You'll also work closely with developers, operations teams, and other stakeholders to ensure a smooth and efficient software delivery process.

# Key Responsibilities

- Design and implement end-to-end CI/CD pipelines using tools like Jenkins, GitLab, or Azure DevOps.
- Automate infrastructure and deployment processes with Infrastructure as Code (IaC) tools like Terraform or Ansible.
- Configure and manage container orchestration platforms like Kubernetes and Docker.
- Collaborate with developers to ensure code quality and adherence to DevOps best practices.
- Monitor and troubleshoot production environments to identify and resolve issues proactively.
- Implement security best practices throughout the software delivery lifecycle.
- Stay up-to-date with the latest DevOps trends and technologies.

# Required Skills and Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience).
- Minimum 2+ years of experience in a DevOps Engineer role (or a related role with strong DevOps exposure).
- Proven experience with CI/CD tools and methodologies.
- Expertise in cloud platforms like AWS, Azure, or GCP (a plus).
- Strong understanding of containerization technologies like Docker and Kubernetes.
- Excellent scripting skills (e.g., Python, Bash).
- Experience with infrastructure automation tools (IaC) is a plus.
- Experience with infrastructure monitoring and troubleshooting.
- · Strong communication and collaboration skills.
- Ability to work independently and as part of a team.
- · Problem-solving and critical thinking skills.

# **Experience Level: Entry-Level to Mid-Level**

We welcome applications from both experienced DevOps Engineers and enthusiastic professionals with a strong foundation in DevOps principles and a willingness to learn.
